Summary

A focused and humble full-stack developer with hands-on experience in backend development, API design, and database systems. I enjoy building real-world solutions that are not only efficient but also scalable. With a strong foundation in Golang and a growing interest in modern web stacks like Remix and Node.js, I aim to create clean, maintainable, and practical applications. I believe in learning constantly — one bug, one project, one commit at a time.

Skills

Backend: Golang, Node.js

Database: MySQL, MongoDB, Prisma

Programming Languages: Golang, JavaScript, TypeScript (learning)

Frontend: React.js, Remix

Tools & Others: Git, Zustand, Postman, Clerk, ShadCN, Figma

Experience

BSNL, Jabalpur

Broadband Technician

On-Site

2021 – Dec 2023

- Managed broadband and FTTH (Fiber-to-the-Home) services.
- Installed and maintained networking equipment for high-speed internet.
- Troubleshoot and optimized internet connections for better performance.

GuruKrupa Placement and Education Solutions Pvt. Ltd

Platform Migration Intern

remote

Jan 2024 – Mar 2024

- Migrated legacy education platform to a modern web stack.
- Refactored backend APIs in Node.js for better performance.
- Implemented authentication and secure state management.

Aegis I-Net Private Limited

Full Stack Developer Internship

Remote

Oct 2024 – Dec 2024

- Developed and optimized full-stack apps using React and Node.js.
- Integrated APIs, database systems, and user authentication.
- Used Zustand for efficient state management.

Projects

THE BUILD MALL – E-COMMERCE PLATFORM

Present

- Built using Remix, Prisma (MongoDB), Zustand, and Clerk authentication.
- Figma-based custom design with full responsiveness.
- **GitHub:** github.com/MohammedSalman999/The-Build-Mall

AFFORD MOTORS EMPLOYEE SYSTEM

Feb 2025

- Built task management app using Remix + Prisma + MongoDB.
- Role-based actions (Admin, Moderator, Employee), Excel reports.
- **GitHub:** github.com/MohammedSalman999/affordmotors

Admin React Dashboard

Oct 2024 – Present

- Built full-featured admin panel using React and Node.js.
- Focused on client-side rendering with efficient state management.
- Implemented charts, dark mode toggle, and user role handling.
- **GitHub:** github.com/MohammedSalman999/adminReactDashboard

SILSILA – RESERVATION PLATFORM

2024

- Golang-based room booking app with Bootstrap frontend.
- JWT and OAuth2 login, full reservation flow, and admin panel.
- **GitHub:** github.com/MohammedSalman999/Silsila-The-Dream

RMS – RECRUITMENT MANAGEMENT SYSTEM

2024

- Golang + MySQL backend with JWT-based job portal.
- Resume parsing and separate applicant/admin modules.
- **GitHub:** github.com/MohammedSalman999/rmsUsinggolang

CAR MANAGEMENT SYSTEM (GOLANG)

2024

- RESTful API-based backend using Golang and MySQL.
- Car booking, authentication, and admin control panels.
- **GitHub:** github.com/MohammedSalman999/CarManagementSystem

Education

Vindhya Institute of Technology and Science

Jabalpur , Madhya Pradesh ,India

B.E. in Mechanical Engineering

2021

- Learned the importance of systems thinking and structural design.
- Gained hands-on experience in machinery and workshop practices.
- Developed an interest in problem-solving, which led to my passion for programming.
