## Summary

I am a dedicated backend developer with hands-on experience in backend systems, API development, and database management. I specialize in Golang, SQL databases, and scalable architectures. Passionate about problem-solving, I focus on building optimized and efficient solutions.

## Skills

**Backend:** Golang, Node.js

**Database:** MySQL, MongoDB, Prisma

**Programming Languages:** Golang, JavaScript (learning), TypeScript (learning)

**Tools:** Git, Zustand, Postman, REST API

## Experience

### BSNL, Jabalpur

Broadband Technician

2021 – Dec 2023

- Managed broadband and FTTH (Fiber-to-the-Home) services.
- Installed and maintained networking equipment for high-speed internet.
- Troubleshoot and optimized internet connections for better performance.

### Guru Krupa Education.com

Migration of Educational Platform

Jan 2024 – Mar 2024

- Assisted in migrating an educational platform from legacy technology to modern web stacks.
- Optimized backend performance with API refactoring in Node.js.
- Implemented authentication, state management, and secure data handling.

### Aegis I-Net Private Limited

Full Stack Developer Internship

Remote

Oct 2024 – Dec 2024

- Developed and optimized full-stack applications using React and Node.js.
- Worked with authentication systems, database management, and API integrations.
- Hands-on experience with state management using Zustand.

## Projects

### E-commerce Platform (Remix)

Present

- Built a full-fledged e-commerce platform with Remix and Clerk authentication.
- Used Zustand for state management and optimized database queries.
- Ensured secure and scalable backend architecture.

### Car Management System (Golang)

Present

- Developed a backend system for managing car inventory and bookings.
- Implemented RESTful APIs and optimized database queries with MySQL.
- Integrated secure authentication and access control.

### Afford Motors Employee Management System

Present

- Designed and developed an employee management system for Afford Motors.
- Implemented user roles, payroll tracking, and database management.
- Used Golang with MySQL for backend processing.

## Education

---

### **Vindhya Institute of Technology and Science**

B.E. in Engineering

2021

- Studied core engineering principles with a focus on problem-solving.
- Developed various software projects integrating backend technologies.
